**Subject:** Resort - Sunriver Village

Dear Commissioners, I am appalled at the audacious move on the part of the Sunriver Resort to enter the fray about the Sunriver village in such a disingenuous way! What a tacky, bush league political move meant to do only one thing. Protect the competitive aspect of the resort with complete disregard for the needs of the community! They have been approached by Citizens for Sunriver, Chamber Board, Individual Homeowners, Silverstar, etc and have very innocently claimed they weren't going to get involved. They waited on purpose until the last minute for personal selfish purposes to try to create the disarray at this last minute hour prior to the potential vote tomorrow when they could have entered into the dialogue and been part of the solution all along. This was planned!! They have done this before. They did it with Mavericks and filed suit at the last minute. Here we are ready to energize the community, improve the tax base, create a \$250MM project, Create jobs and improve property owner values and the Resort can't figure out until now that they don't understand something! They understand perfectly what they are doing. Why are they being given this voice at this stage and allowed to stop the process? Why do they get to take time tomorrow to stop this process? They are one vote and they have not been good neighbors! The community and the SROA has assisted them all along the way with everything they wanted. Lake Penhollow, Lodge expansion and remodeling, Land swamp, etc and how do they treat the community? Complain at the last minute on purpose to stop the redevelopment. I am disappointed at my first foray into politics comes down to money and influence!. The people in Sunriver are the losers in this. Delays, loss of a developer, businesses going under. This vote is needed now not delayed by the tactics of Sunriver Resort!. This is a move by a competitor to stop competition and should be viewed as such. This community will be outraged that they are now given special allowances to delay this process!

Disappointed!
